

Information Security Policy

Applies to all employees, contractors, and vendors with access to Northbridge Analytics systems. Effective January 2026.

1. Password Requirements

All system passwords must be at least 12 characters long, include a mix of upper and lower case letters, numbers, and symbols, and must be changed every 90 days. Password reuse across the last 5 passwords is not permitted.

2. Device Security

Company-issued laptops must have disk encryption and endpoint protection software enabled at all times. Employees must not disable or uninstall security agents without IT approval.

3. Data Classification

Data is classified as Public, Internal, Confidential, or Restricted. Client data is always classified as Confidential or Restricted and may not be stored on personal devices, personal cloud storage, or removable media.

4. Access Control

Access to production systems is granted on a least-privilege basis and reviewed quarterly by the security team. Multi-factor authentication is mandatory for all accounts with access to Confidential or Restricted data.

5. Incident Reporting

Any suspected security incident, including lost devices, phishing attempts, or unauthorized access, must be reported to the security team within 24 hours via the incident reporting form on the internal portal.

6. Third-Party Software

Installation of third-party software on company devices requires approval from IT. Browser extensions that request access to page content on internal tools are prohibited.
